

When Can I Use My New Tile?

- It is recommended that you can use your shower 72 hours after installation is completed.
- Avoid walking on your new tile floor for 24 hours after installation is completed.
- Grout haze can be wiped off with a damp cloth 12 hours after installation is completed.
- If you have a heated floor installed **do not** turn on the heat for 28 days.

By following these important guidelines, it will ensure your *happiness* with your new tile.

Cleaning

- You may clean your new tile 72 hours after installation.
- Using a cleaner recommended by Kelly's Carpet Omaha will ensure the beauty of your new tile.
- Avoid using any cleaner with bleaching agents.
- If you have a tile shower after use wipe it down with a towel.

Grout & Stone Care

- Due to seasonal change in humidity caulking maintenance can be expected.
- All natural stone was sealed at the time of installation. Follow recommended maintenance sealing in the future.
- Your grout with polymer does not require sealing; however you may seal it with a water-based sealant if you choose.

If you had a shower installed, it was done using Schluter System products, which results in the best tile installation. These products prevent cracking at tile edge, mold growth and ensure a waterproof system.
